An artist envisioned a "spa of her own" to relax, decompress and wash away the dust of L.A. Her ideal retreat would include soothing "green" materials and evoke the outdoors.

Thinly streamlined bamboo cabinetry for her vanity and make-up areas responds to her eco-friendly style and grants storage for toiletries, cosmetics and jewelry.

Personalized for the client's stature, the vanity vessel sinks and faucets sit proud on the countertop, and though unexpectedly high, they seek to become proportionate to the monumental, recessed mirror. Recessed halogen lighting and additional sconces dim to the correct level in order not to compete with the soft candlelight glow.
